Looking for:

- Business partners in Japan
- Business opportunities in for our product "Custom Sea-Food Business" in Japan

Business Nature

Product or Services:

Beyond Technology offers customized software development services and provide our outstanding product such as intelligent Enterprise and Manufacturing Resource Planning System, so called VANA and MFOOD, respectively.

VANA is an Intelligent Enterprise Resource Planning (ERP), where it streamlines the process path model by using information technology activities linked to information resources of each section within the organization together. Then create a process flow of information into the system to all parts of the organization by using data from the same source in management. It helps organization to reduce overlap and repeated error in planning and management where information and resources are put together to drive business momentum.

VANA is a software business solution package covers variety type of business activities, for example;

1. Trading
2. Manufacturing
3. Logistics Management
4. Maintenance
5. Accounting

MFOOD is an Intelligent Material Resource Planning (MRP) for Seafood Processing Industry, with specialization in frozen seafood and frozen surimi.
