Looking for:

Partners who want to outsource their software/web application development and testing.

Business Nature

Product or Services:

Enspry offers software/web application development and quality assurance services. Enspry engineering team has extensive experiences in application development and testing. Our knowledge, skills and experiences are our products. Enspry strives to help our customers reduce their development and maintenance costs, accelerate their product development time-to-market and promote their software/web application quality.

Our key services are:

- Outsourcing software/web application development and testing services.
- Software testing analysis, planning, development and execution; software failure analysis, isolation and resolution.
- Designing and developing automated testing software/system.
- Developing/customizing tools to facilitate software development and testing processes and methodologies to accelerate productivity, reduce risks, and increase control.

Credential Reference

Reference Japan /organizations, your company used to work it:

- Cisco Systems, Inc., Ethernet Switching Technology Group, San Jose, California, USA.
- A special investment promotion status from BOI, Thailand Board of Investment, a government unit in charge of promoting investments in areas deemed crucial to the development of Thailand competitiveness.
- Personal Software Process (PSPSM) certification from Software Engineering Institute (SEI), Carnegie Mellon University -- a certificate that promotes disciplined and structured approach to software development and ensures the knowledge and skills to competently deliver quality software on predictable schedule.
