### Looking for:

Market opportunity for Web-based ERP and Integrated Project & Resource Management Solution

### Business Nature

#### Product or Services:

Ictus, one of leading system integrator companies in Thailand, has served local market for over two decades. We, as multi-standard compliance organization, are highly concerned about service quality and has adopted global standard into our IT works. Our quality policy is "Provide the Best Solutions with Creativity and Teamwork" by many more professional certified people.

Our solutions and products offering is our ERP solution, the **Pure Web-Based ERP** application "**The Easy way to get Account/Finance Information from Multi-Location**". The system is built on J2EE technology and come with many accounting and finance essentials to support total company information system at one single place.

**Integrated Project & Resource Information System Management** is another solution "**The bundled solution of employee skill, resource assignment and timesheet information for effective project management**". The system is built by .Net technology which promotes communication and cooperation among project members, embeds workflow to notify of task assignment, problem & issues, ease of monitoring and controlling progress of individual task and overall project, foresee cost & time deviation and provides useful matrix information for improvement analysis.
